Saturday December 12 2009
08:30 am – 03:00 pm

Stamford Hospital
30 Shelburne Rd.
Stamford, CT 06904
PROGRAM OVERVIEW
Nurse-performed radiographic interpretation of PICC lines is a relatively new role for nurses, requiring increased knowledge and expertise. The presenters will discuss vascular anatomy and utilize actual radiographs for illustrating the various normal and abnormal PICC placements. Participants will test their knowledge on selected radiographs.

Target audience includes PICC team members, vascular access specialists or nurses working with central line placement.

OBJECTIVES
At the end of this course the participant will be able to:
1. Describe normal and variant venous anatomy as it pertains to PICC placement.
2. Apply knowledge of chest radiography and radiographic anatomy in identification of the atrial-caval junction.
3. Correctly identify the PICC tip position on sample radiographs.
4. Discuss legal considerations regarding RN radiographic interpretation.

PRESENTERS
Jamie Bowen Santolocuito, RN
- Clinical Nurse
- Consultant/Educator
- Vascular Access/Infusion Therapy
- Oregon Health Sciences University Hospital

Dave Vegas, M.D., M.S.
- Diagnostic Radiology Residency, Oregon Health & Science University
- Internal Medicine Internship, OHSU
- Graduate of the University of Miami School of Medicine
- Interventional Radiology Fellowship applicant
- Member ACR, RSNA, ARRS

ACCREDITATION
The program is approved for 6.0 contact hours by the Utah Nurses Association, which is an accredited approver of continuing education in nursing by the American Nurses Credentialing Center’s Commission on Accreditation. Also approved by California Board of Registered Nursing provider #CEP12028
