

Self Assessment	Performance Criteria	Date	Preceptor	Orientee
	<p style="text-align: center;">PERIPHERAL IV ACCESS</p> <p>1. Successfully places PIV in neonatal population _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date</p> <p>2. Successfully places PIV in pediatric population _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date</p> <p>3. Maintains universal precautions</p> <p>4. Utilizes vein illumination devices including ultrasound, transilluminator, and/or VeinViewer</p>			
	<p style="text-align: center;">PICC INSERTION</p> <p>1. Verbalizes knowledge of PICC insertion indications/contraindications.</p> <p>2. Verbalizes knowledge of acceptable PICC tip location.</p> <p>3. Verbalizes knowledge of vein selection and access sites, including alternate sites for neonates and infants.</p> <p>4. Performs pre-insertion assessment, reviews chart, and verifies consent</p> <p>5. Verbalizes understanding of product choices and manufacturer's recommendations.</p> <p>6. Utilizes maximum barrier precautions for insertion.</p> <p>7. Demonstrates ability to set up and maintain sterile field throughout insertion.</p> <p>8. Demonstrates appropriate measuring techniques for PICC placement from AC and alternate sites.</p> <p>9. Successfully places PICC in neonate taking measures to prevent cold stress.</p> <p>10. Demonstrates understanding of ultrasound guided MST technique</p> <p>11. Successful insertion of Neonatal PICCs _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date</p> <p>12. Successfully insertion of pediatric PICCs using ultrasound guidance/MST</p> <p>13. _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date _____ date</p> <p>14. Demonstrates management of jugular malposition of PICC tip.</p> <p>15. Verbalizes techniques for management of other malpositions.</p> <p>16. Coordinates PICC placement with other procedures utilizing anesthesia, demonstrating proper OR technique and etiquette.</p> <p>17. Appropriately identifies patients who are candidates for sedated PICC insertion and initiates contact with the sedation team.</p> <p>18. Verbalizes understanding of age appropriate interventions for minimizing procedural anxiety and pain</p> <p>19. Utilizes topical and injected analgesics as appropriate including J-tip administration</p> <p>20. Utilizes child life department for procedural support</p>			

	21. Supports parental presence as appropriate 22. Initiates teaching with parents/caregiver by discussing procedure prior to insertion 23. Verbalizes/demonstrates steps for catheter exchange			
Self Assessment	Performance Criteria	Date	Preceptor	Orientee
	PICC MAINTENANCE			
	1. Performs sterile dressing change on PICC: <ol style="list-style-type: none"> a. Neonate- upper extremity b. neonate-scalp c. neonate-lower extremity d. neonate, fragile skin 2. Performs sterile dressing change on PICC in pediatric patient 3. Verbalizes signs and symptoms, and management of <ol style="list-style-type: none"> a. mechanical phlebitis b. site infection c. skin breakdown d. suspected thrombus 4. Performs PICC declotting <ol style="list-style-type: none"> a. for complete occlusion, utilizing negative pressure/stopcock method b. for partial occlusion, calculating catheter priming volume 			
	X-RAYS			
	1. Signs on to PACS system to review x-ray 2. Visualizes PICC and tip location with radiologist when possible 3. Recognizes proper tip location and malpositions 4. Demonstrates use of PACS measuring tools 5. Visualizes PICC on fluoroscope when used			
	DOCUMENTATION			
	Appropriately utilizes the following electronic charting components: <ol style="list-style-type: none"> 1. Physician orders 2. Procedural time-out 3. Central line checklist 4. central line insertion 5. names CVAD 6. family education 7. uses EMar/barcoding as appropriate 8. utilizes downtime forms when necessary 			
	PERIPHERAL ARTERIAL ACCESS			
	1. Appropriately identifies patients who are candidates for peripheral arterial access for lab draws 2. Identifies sites suitable for peripheral arterial access 3. Performs Allen maneuver for radial artery 4. Successfully performs arterial puncture 5. Uses direct pressure to achieve hemostasis			
	Billing and Ordering			
	1. Enters patient charges via Ped. Vascular Access Charge screen in Cerner 2. Assigns patient charges for supplies as indicated via PAR-EX
